EASY - FAST - SAFE - FLEXIBLE

 *EasyPlug* 

Flexibility in all aspects

EasyPlug - our new connection system

EASY:

All products can easily be connected by an identical plug-and-socket-system. The products can be connected and separated without using any tools. Even big illuminations need only few connections for power supply.

FAST:

Time for installation and setting-up is reduced due to easy installation.

FLEXIBLE:

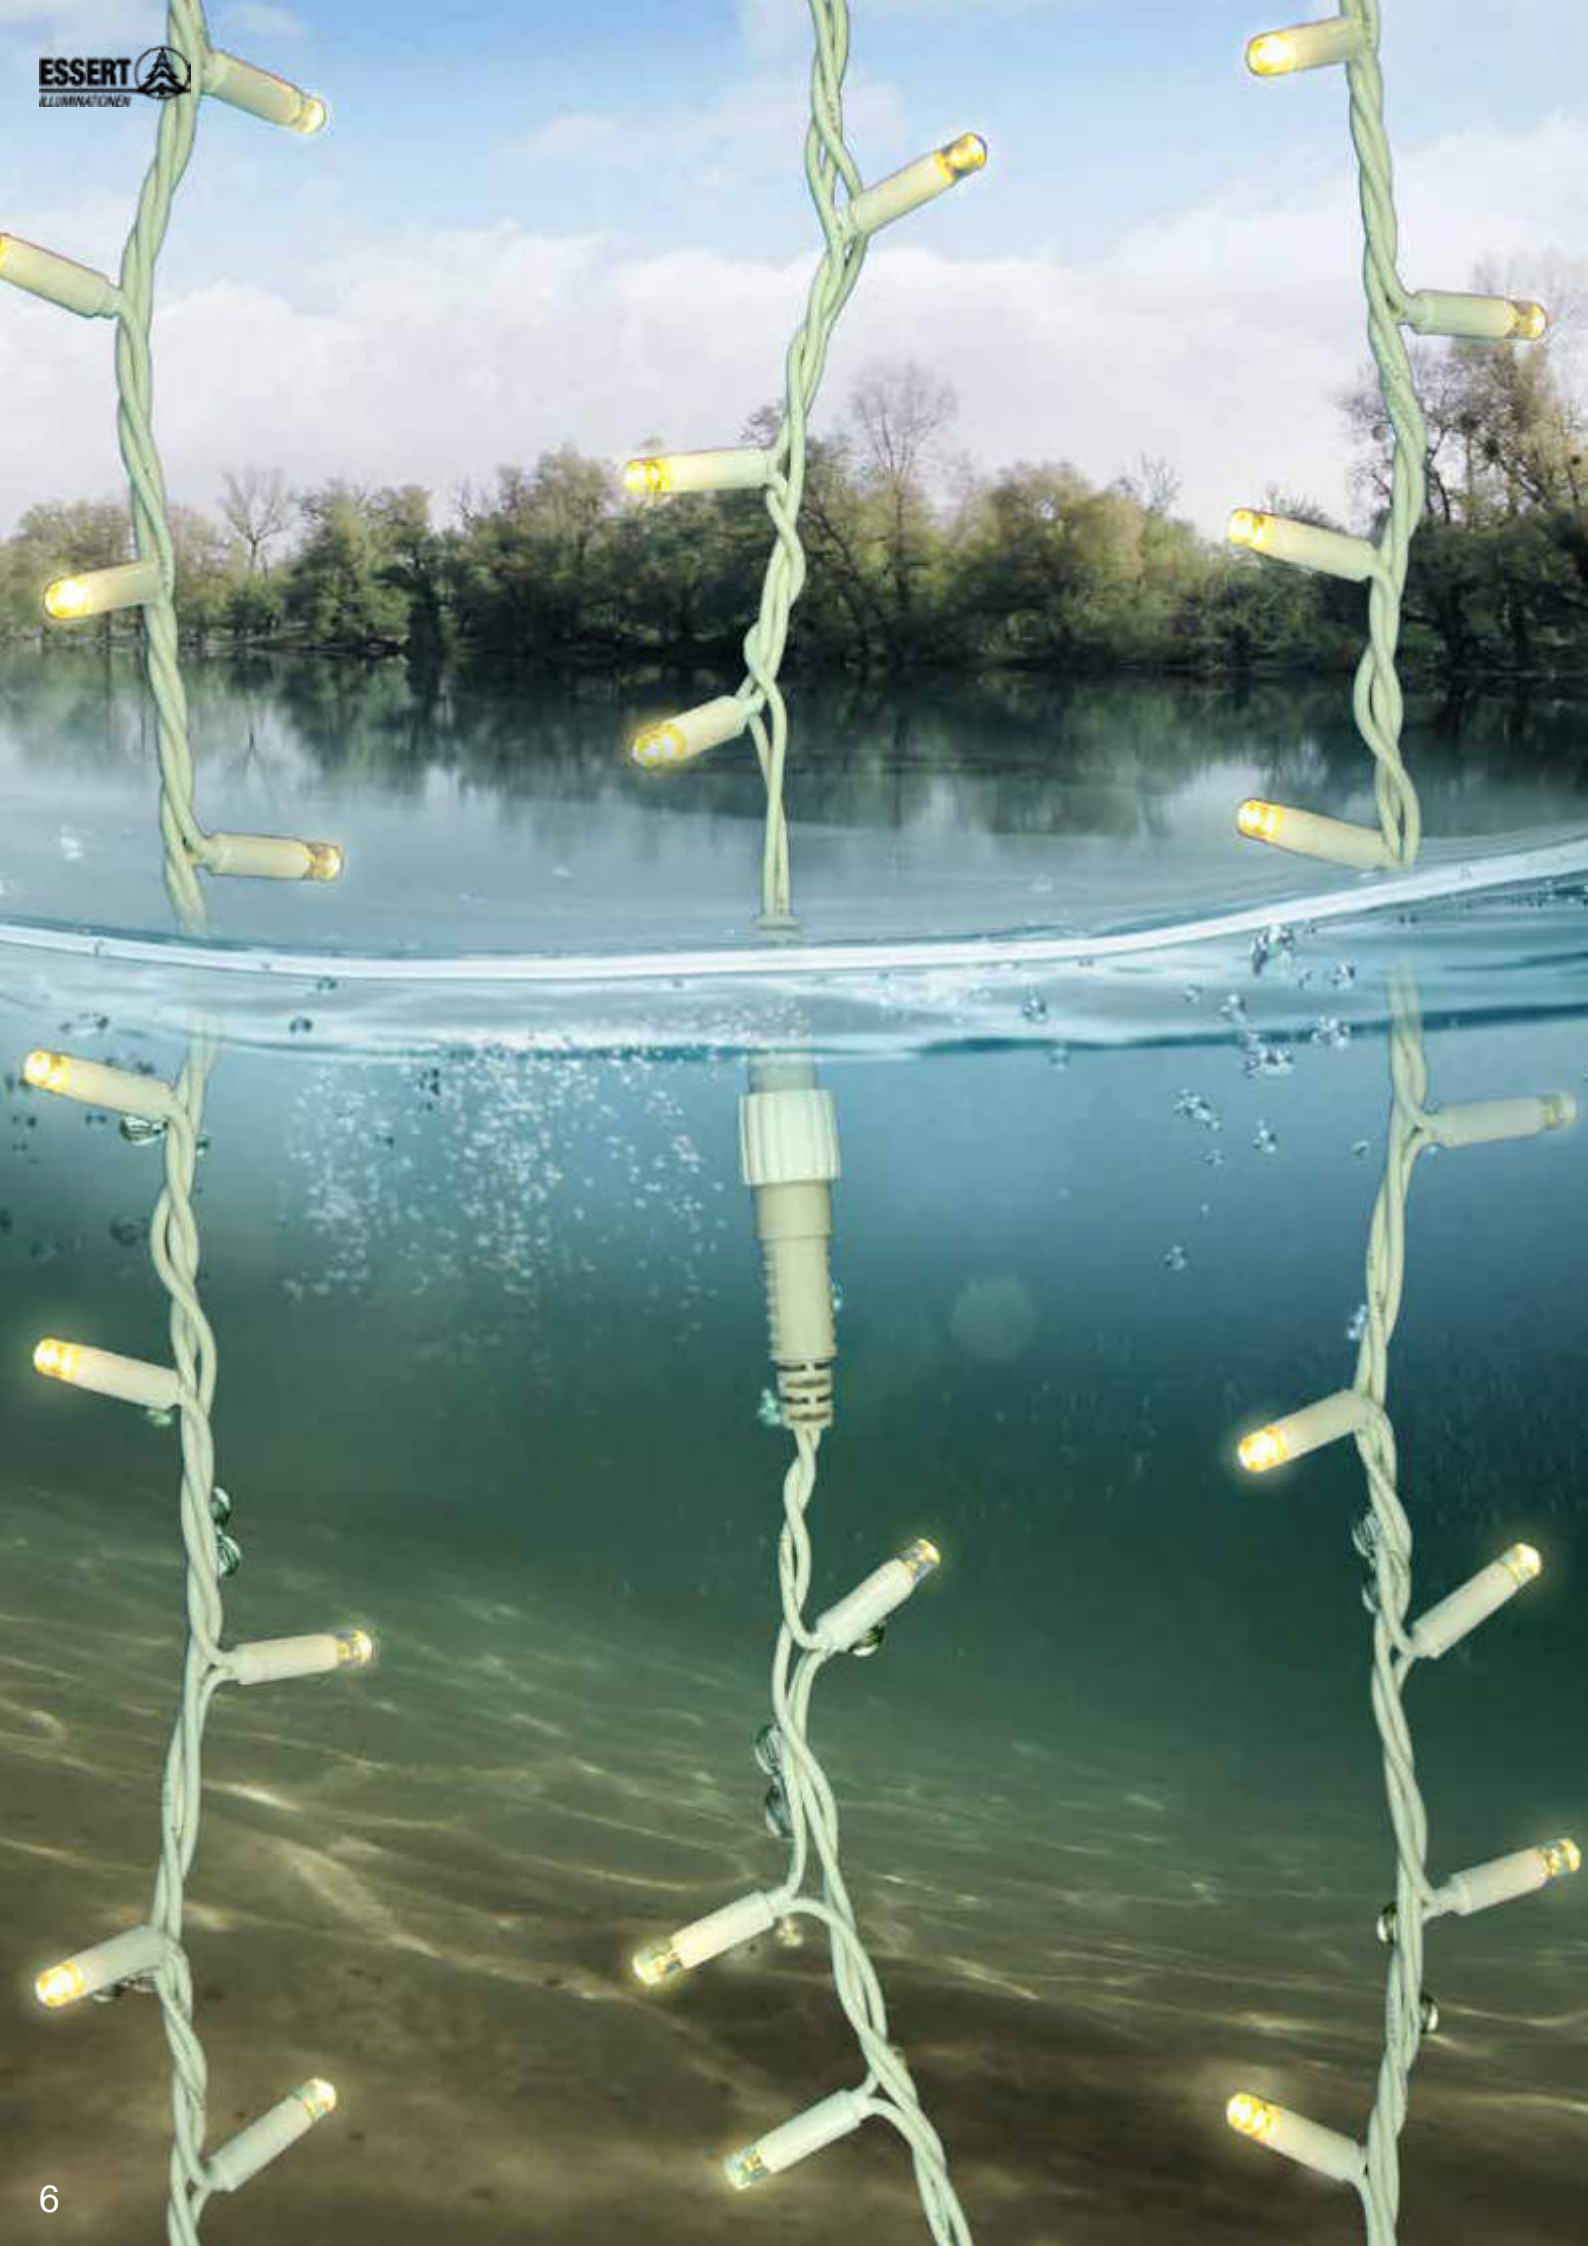

The large assortment of T-dividers and extension cables enable numerous lighting variations and individual custom-made creations.

SAFE:

IP67 is our new standard: High protection against ingress of dust and moisture.

COMPATIBLE:

Using adapters, our IP44-system can be connected to our new IP67-installations.

Highest safety due to IP67

Our EasyPlug connectors with special internal seals ensure absolute tightness.

As our standard protection class, IP67 guarantees absolute dust-tightness and protection against the ingress of water during temporary submersion for up to 30 minutes (to a depth of 1m). Double sealing rings provide additional protection. This ensures the highest level of safety both during installation and in everyday use.

LED ROPE LIGHT

230 Volt

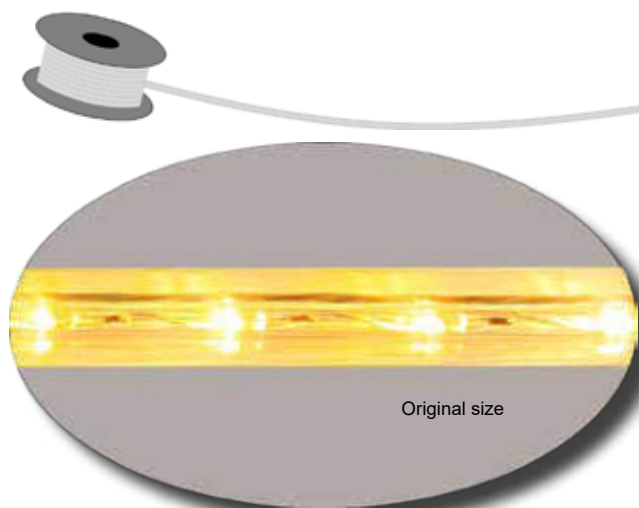

Impressive light effects in warm white, brilliant white or coloured versions make our rope light a versatile design element. Used as a single element or installed in motifs, the LED rope light is of professional quality with extremely low power consumption. The reel with 45 metres rope light can be cut every 1,5 metres, which also allows individual lengths. Our novelty: neon flex rope light with a neon optic and SMD LED. It creates a pleasantly bright and diffuse lighting effect, the opal surface ensures a uniform appearance. For this product, the reel with 50m rope light can be cut every 0,5 metres.

LED RL36	45 m	1620 LED	Page	10

LED LIGHT STRINGS

230 Volt

Our versatile light strings system offers the perfect LED light string for every professional requirement. Especially trees, buildings, streets, squares and Christmas markets can be atmospherically staged with our products.

Our LED light strings are produced in different lengths and with different LED distances, therefore, the right light string can be selected for every application.

Different colours and RGB illumination complete the product range. With the new EasyPlug system, all light strings and accessories are easy to connect.

© Stadtverwaltung Pirmasens, Sabine Reiser

LED GL90

230V EasyPlug

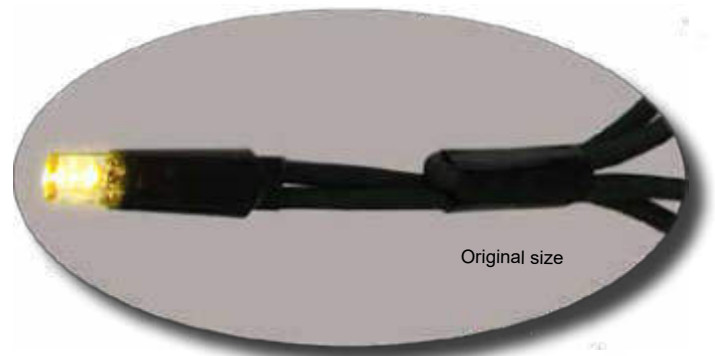

New: Growing light -

Our LED light strings with growing effect:
Very gentle to trees, as they adapt to the
growth of the trees.

These light strings can be wound around the
trunk and the branches. These are equipped
with loops in the cable, which open with the
growth of the tree and release additional
cable.

Particularly suitable for:

Permanent illumination, especially in small
trees

LED ICICLE LIGHT

230 Volt

Vertical strings of light with different lengths in the icicle chains create a romantic atmosphere in individual areas. The icicle design emphasises the contours of buildings and spreads wintry flair in shops and squares.

With the help of the versatile EasyPlug system, combinations with any motif are possible. This creates an individual look for each project and makes it stand out with its uniqueness.

LED LIGHT PRODUCTS

24 Volt - Low Voltage

Our light products in 24 volt version (low voltage) provide solutions for special safety requirements of light strings. Despite low voltage, the ingress protection is also IP67. Installations within reach of hand, low surfaces and at places accessible to the public can be carried out with highest safety. Transparent cables make the strings almost invisible. Light strings in low voltage version offer highest brightness for professional use, comparable to those LED products of our established 230 volt series.

LED RL36-24	30 m	1080 LED	Page	60
LED ST42	4 m	42 LED	Page	62
LED ST80	4 m	80 LED	Page	63
LED ST400	50 m	455 LED	Page	64
LED MST420	100 m	420 LED	Page	65
LED STP120	2,5 m	120 LED	Page	66
LED NL97	2 m x 1 m	97 LED	Page	67
LED IC144	3,0 m x 0,8 m	144 LED	Page	68
LED DP1	2,0 m x 1,5 m	280 LED	Page	69

Our EasyPlug-system provides easy and safe connections of our LED light strings. It optimizes access points and installation time.

HIGH LUMINOSITY
HIGH BRIGHTNESS
SHOCK RESISTANT

LOW POWER CONSUMPTION
LOW HEAT EMISSION
EXCHANGEABLE PARTS

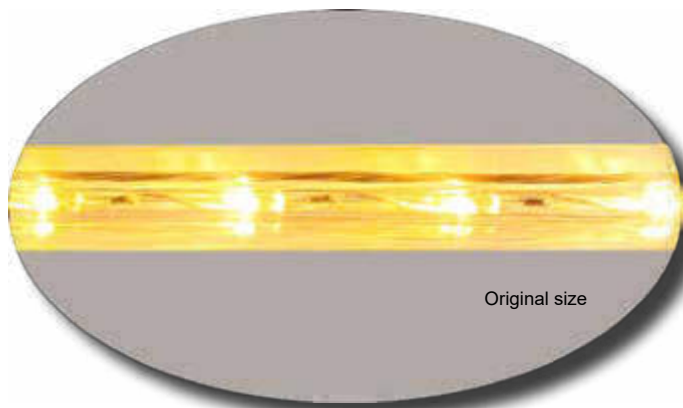

Best light output -

due to:

- horizontal configuration
 - angle of radiation 360°
- incl. PR1 RL M and AC2 LED EU

Particularly suitable for:
Contour lighting and decorations within reach of hand

LED RL36-24 W

○○○ LED white

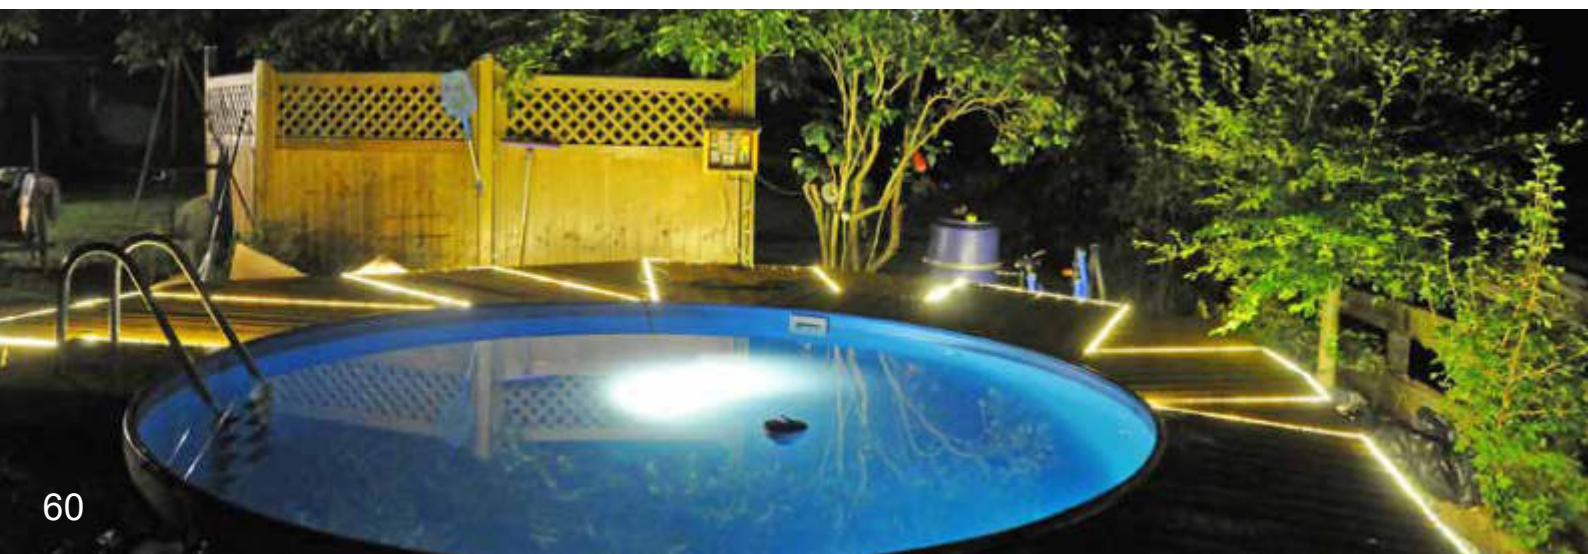

999-955E

LED RL36-24 WW

○○○ LED warm white

999-959E

Length / reel	30 m
Diameter	11 mm
Number of LED	36 LED/m
Distance of LED	2,8 cm
Voltage	24 V
Power	2 W/m
Extendable	1 reel = 30 m
Dividable	every 0,5 m
Further accessories on page 70 (low voltage).	

ACCESSORIES

PR1 RL-24 M

transparent cable

999-948E

Contents:

Length	0,5 m	Voltage	24 V
IP protect.	IP67	Power	max. 240 W
		PVC cable	H03VV-F

PR1 RL-24 F

transparent cable

999-946E

Contents:

Length	0,5 m	Voltage	24 V
IP protect.	IP67	Power	max. 240 W
		PVC cable	H03VV-F

SP2 RL-24

Connection pin:
rope light - power cord

999-881E

SC2 RL-24

Connection pin:

Shrinking tube incl. glue
transparent

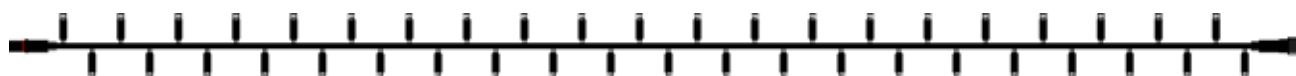

330-007E

EC01 RL-24

Terminal cap for rope light, Ø 13mm
transparent

999-945E

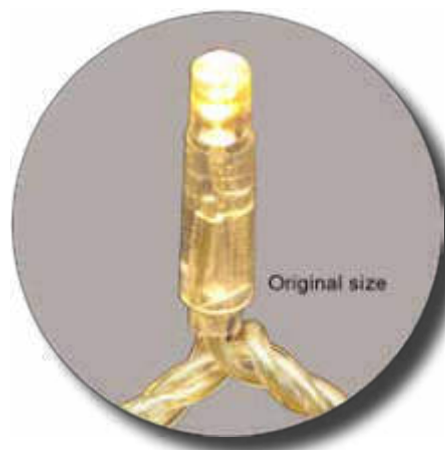

LED ST42

Invisible installations -

Illuminations with transparent cables enlighten objects without any interfering effect of the cables themselves.

Particularly suitable for:
Indoor and outdoor decorations in hand areas

LED ST42 W

○○○ LED white
transparent cable  **101-521E**

LED ST42 WW

○○○ LED warm white
transparent cable  **101-526E**

Length	4,0 m
Number of LED	42 LED
Distance of LED	10 cm
Voltage	24 V
Power	1,8 W
Extendable	20 pieces = 80 m
Further accessories on page 70 (low voltage).	

LED ST80

Filigree and transparent -

Due to the narrow lamp distance, this low-voltage light string achieves high luminosity with a short cable length. It is easy to decorate and shows a pleasant light effect.

Particularly suitable for:
Illumination of small trees, e.g. in hand areas

LED ST80 W

○○○ LED white
transparent cable  **101-510E**

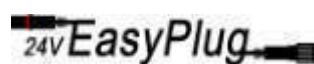

LED ST80 WW

○○○ LED warm white
transparent cable  **101-518E**

Length	4,0 m
Number of LED	80 LED
Distance of LED	5 cm
Voltage	24 V
Power	3,7 W
Extendable	15 pieces = 60 m
Further accessories on page 70 (low voltage).	

LED ST400

Solid and safe -

With solid rubber cables, the light strings on these two sides are very durable and resistant.

Particularly suitable for:
tree illumination in places accessible to the public

LED ST400 W

LED white

black cable

~ 101-531E

LED ST400 WW

LED warm white

black cable

~ 101-538E

Length	50 m
Number of LED	455 LED
Distance of LED	10 cm
Voltage	24 V
Power	15,6 W
Extendable	2 pieces = 100 m
Further accessories on page 70 (low voltage).	

LED MST420

LOW VOLTAGE 24V

24V EasyPlug

Great light effect -

This classic bulb form spends an outstanding luminosity. Solid rubber cable and the low voltage version (24 Volt) provide safety even in the hand area. The convenient 100m reel offers a disconnect option every 5 metres.

Particularly suitable for:
traditional Christmas trees in sensitive areas

LED MST420 WW

LED warm white

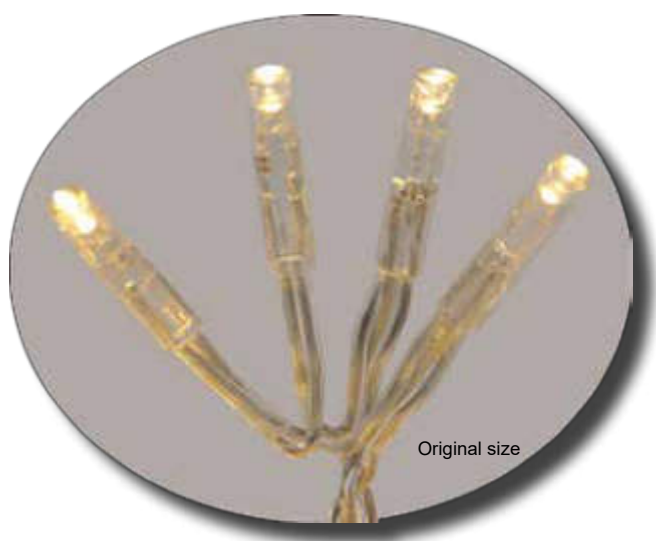

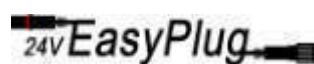

black cable

102-594E

Length	100 m
Number of LED	420 LED
Distance of LED	24 cm
Voltage	24 V
Power	13,5 W
Dividable into	20 pieces of 5 m
Extendable	2 pieces = 200 m
Further accessories on page 70 (low voltage).	

LED STP120

Impressive look -

Novelty: Our STP cluster light string with 30 bundles of 4 LEDs each creates a playful and irregular look with a great luminosity.

Particularly suitable for:
Interesting and flexible decorations in hand areas

LED STP-120 W

LED white

transparent cable

101-571E

LED STP-120 WW

LED warm white

transparent cable

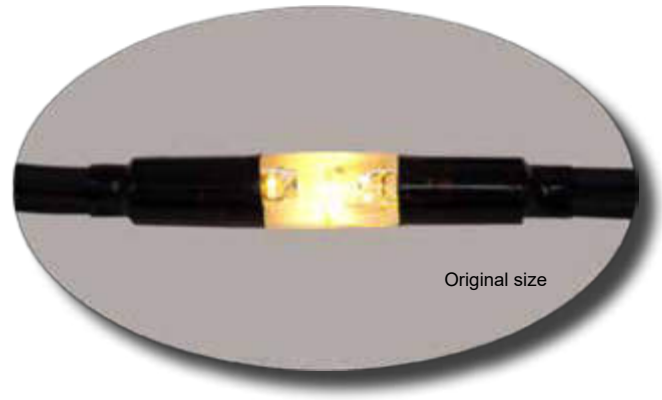

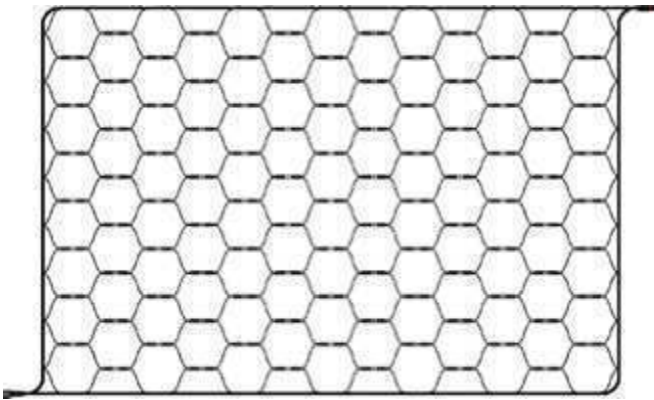

101-578E

Length	2,5 m
Number of LED	120 LED
Bundle spacing	8,3 cm
Voltage	24 V
Power	5,2 W
Extendable	8 pieces = 20 m
Further accessories on page 70 (low voltage).	

LED NL97

Even surfaces -

Our light nets provide a uniform light surface, in low voltage they can also be used in hand areas.

Particularly suitable for:
globe trees, hedges, bushes

LED NL-97 W

○○○ LED white
black cable

~ 108-511E

LED NL-97 WW

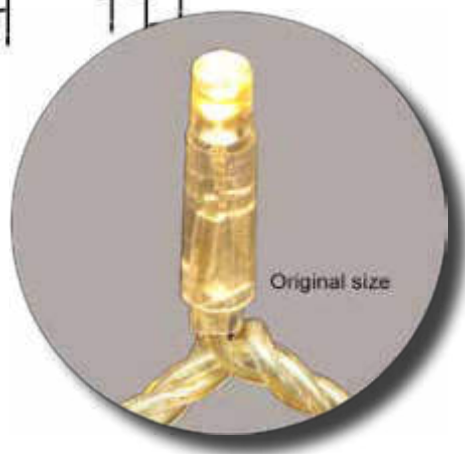

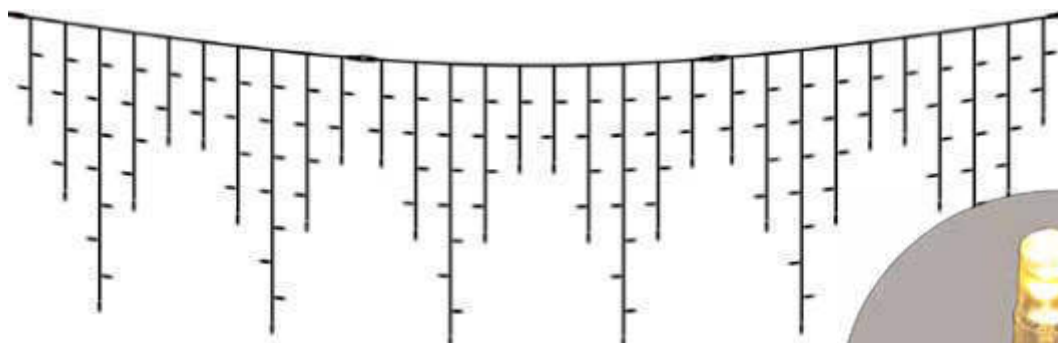

○○○ LED warm white
black cable

~ 108-518E

Dimensions	2 m x 1 m

Benefit from the advantages of the ESSERT LED bulbs:

Very low energy consumption with a very long service life, up to 90% electricity and CO₂ savings compared to filament bulbs. Average service life up to 30000 hours.

Pleasant warm white light colour with incandescent look. No laser effect, angle of radiation 360°.

Minimal heat development, unbreakable plastic bulb (clear or opal) 45 mm made of polycarbonate.

Easy lamp replacement as equipped with standard base E27, suitable for outdoor use with E 27 lampholders in IP protection class IP-X4.

Art. No.: 112-057 LED-LB-E27-WW clear

Art. No.: 112-061 SMD-LB-E27-WW clear

Brass base prevents oxidation.

6 diodes warm white in transparent or opal polycarbonate bulb G 45 mm, shatterproof, brass base, light bulb optics for brilliant light.

0,7 W / 230 V, 5 VA, 31 Lm, colour temperature 2300 K. Luminosity is comparable to a light bulb of 7 W.

Note: The amperage of the LED lamps for sockets E27 of 5 VA per piece indicates the dimensioning of the electrical cable and switch.

12 SMD LEDs warm-white in transparent polycarbonate bulb G 45 mm, shatterproof, brass base, light bulb optics for brilliant light.

1,0 W / 230 V, 2 VA, 80 Lm, colour temperature 2300 K.

Note: The amperage of the LED lamps for sockets E27 of 2 VA per piece indicates the dimensioning of the electrical cable and switch.

Large-scale illumination of facades and floor areas
with individual logos and Christmas greetings

Create your individual
projection concept

The large-area illumination with
Christmas wishes, logos and mo-
tifs are customised according to
your ideas and the local
conditions.

Please contact us.

Projections provide us with a new kind of Christmas illumination. Together with a wide range of products we can form a large-scale Christmas scenography.

Using our projectors, it is possible to style building surfaces with dynamic Christmas images and thus to illuminate your city in many different ways with lights, colours and animated images.

For example, you can get a fresco painting onto a church façade, convey kind wishes and messages in text form. Moving stars and snow effects as well as many more imaginative solutions create a fascinating atmosphere.

We would like to offer our customers a new and original solution for unique and impressive Christmas staging. Thanks to our longterm experience in the production and planning of Christmas lighting concepts, the product extension with our projections rounds off our product range and enables us to create completely new, impressive lighting concepts in the public sector.

Evoking a stirring atmosphere is always a great chance for profiling and image enhancement, especially in the season of advent and Christmas. Our company ESSERT-Illuminationen was founded in 1946 and is one of the leading German manufacturers of professional Christmas illumination and decoration. ESSERT-Illuminationen already exists in the third generation and is now managed by Andreas Essert.

Creative ideas in design, innovative illumination concepts together with highest quality and customer orientation make us a competent planner and supplier in Europe. Thanks to our own production in Eichenbühl, Germany, we are extremely flexible and can thus also realize very individual customer requirements and ideas.

Our focus is on:

Innovative solutions for the illumination of streets and squares as well as decorative lights at buildings and trees. Individual special constructions made of aluminum according to customer specifications, signs and letterings, emblems, logos and special holders. We deliver high-quality, environmentally friendly and energy-efficient LED Christmas illuminations and LED light strings for outdoor and indoor use.

We are also prepared for conversions of your traditional Christmas illumination to energy-saving LED lights. For this purpose we have created our own special Essert LED bulb.

Our latest product category are illuminated 3D-decorations made of fiberglass, which offer many areas of application and are ecologically and durable.

Our range of services includes:

On-site consulting, visual presentations with digital image processing. Compilation of individual illumination concepts for large city projects, also in cooperation with external light planners and designers. We guarantee reasonable prices and conditions, products of firstclass quality with a long economic life time and therefore low follow-up costs.

Our customers are:

Public services, municipal utilities, city management, property management, shopping centres, furniture stores, electrical wholesale, industry.

Consultation, planning, production and installation from a single source are essential for our uncomplicated and fast realization of large projects.

Complete service - consultation, planning and production from a single source.

Our high-quality, versatile and energy-saving products enable the creation of brilliant LED Christmas lightings in countless variations.

Different people associate lighting with a wide range of emotions:

Our works of light art turn every occasion into a very personal and unique experience.

This is what defines us: Essert-Illuminationen - Light Emotions.

Step 1: Enquiry

You can contact us by phone, e-mail or via our homepage to obtain information, present your wishes and discuss any further procedure. Advice, planning and production from a single source are decisive for the uncomplicated and rapid realisation of large and small projects entirely according to your ideas.

Step 2: Customer's requirements

Let us know your ideas or wishes so that we are well prepared for the next step. With our own production in Germany at our location in Eichenbühl, we are extremely flexible and can therefore respond to your individual wishes and find the best customised solutions.

Step 3: Consultation

Depending on the size of the project, we will advise you in detail by phone, e-mail or on site. For a consultation that does not take place on site, photos in digital form and high resolution (at least 300 dpi) are helpful to create individual image animations for you.

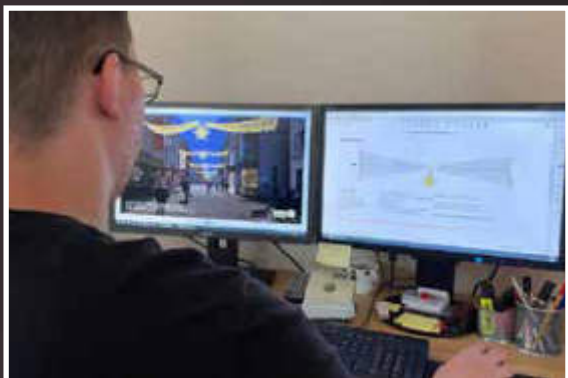

Step 4: Conceptual design

Thanks to many years of experience and our great know-how, we create a coherent overall concept for any size of project, sometimes also in cooperation with external lighting planners and designers. In the process, you receive our photo-realistic images that help you decide on the right product according to your wishes.

Step 5: Technical Planning

Our customers associate a promise of quality with the professional, environmentally friendly and energy-saving products from Essert-Illuminationen. To ensure function and safety, we offer various innovative solutions. We clarify the design and wiring of electrical connections, as well as the mounting of our products.

Step 6: Production

After you have decided on our products or concepts, we will manufacture them for you in the utmost quality. As one of the leading manufacturers in the premium segment we attach great importance to innovative design ideas, high-quality materials, first-class workmanship, ease of assembly and environmental friendliness of our products.

Step 7: Shipping

We coordinate the complete logistics for you - punctual delivery of your lighting to the right place according to your specifications. Our location in Germany enables short transport routes - fast and resource-saving.

Step 8: Installation

Due to our own production, it is always possible for us to manufacture and offer individual, customised fixings for our Christmas illuminations. We are happy to support your existing team with information and instructions. If the mounting is not feasible for you, we will organise the installation on site for you.

Step 9: Showtime

Now the great moment has come - your lighting is ready to brighten up Advent and winter evenings and let the special character of your place shine. Our light experiences are visitor magnets. They put a smile on people's faces and bring a sparkle to children's eyes. The homely atmosphere created by our brilliant lighting turns every visit into a special moment full of pleasant emotions.

3D-Motifs with high quality LED light strings and LED rope light warm white or white, 24/230 volts, on aluminium profiles, protection class II / III, ingress protection IP44/67, CE label.

Big Snowman
Art. No.: 192530010
125 cm x 235 cm x 120 cm
21,8 W · approx. 29 kg
platform on request

Small Snowman
Art. No.: 192530036
85 cm x 170 cm x 45 cm
12,4 W · approx. 9 kg
platform on request

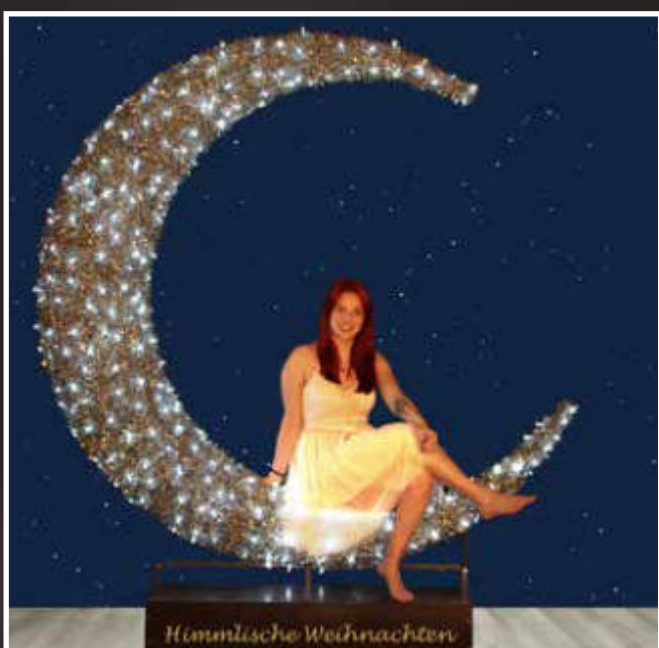

Golden Angel
Art. No.: 182425236
225 cm x 260 cm x 65 cm
110 W · approx. 29 kg
platform on request

Silver moon
Art. No.: 192530053
205 cm x 235 cm x 55 cm
16,2 W · approx. 64 kg

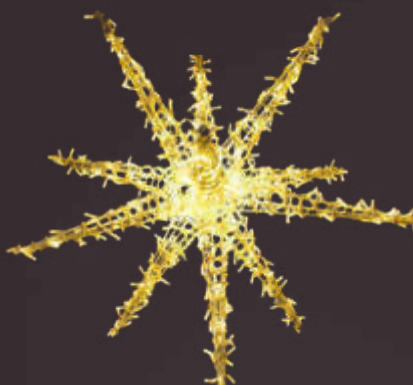

Picture frame
Art. No.: 192424337
300 cm x 280 cm x 150 cm
116 W · approx. 46 kg

with LED illumination, LED lights strings warm white, IP67, coloured powder coating possible (extra charge).

Art. No.: 190220063
150 cm x 155 cm x 55 cm
25 W · 9,5 kg

Art. No.: 170210016
140 cm x 140 cm x 140 cm
36 W · 7,5 kg

Modern and sustainable ideas for lighting and decoration:
Decorations made of fiberglass - mineral, organic, recyclable

Rottenburg

In our modern world, it is especially important to take our environment into account, even with decorations. Our decorative elements made of fiberglass correspond to this environmental thought, since due to the sustainability (extremely long-lasting) and recyclability, a great advantage is given in comparison to other materials. The main ingredient of our fiberglass products is quartz sand, which is available in almost inexhaustible quantities on our planet. For our fiberglass, we guarantee a minimum mineral content of over 90%. Likewise, the production of fiberglass is less energy consuming compared to other materials.

Fiberglass is absolutely weatherproof, UV-resistant and lightweight. It impresses with its unique filigree design, which shows our energy-efficient LED lighting particularly brilliantly. It is unbreakable and there is no material wear, even after several years of use. Oversized luminaires can be produced without any problems, as the material is extremely flexible and light, but nevertheless very stable.

All products are also available in B1 quality - flame retardant.

Patented production in Germany:

= short delivery routes throughout Europe = fewer pollutants = less environmental impact

FOR THE ENVIRONMENT - FOR NATURE - FOR PEOPLE

UNIQUE SHAPES, MANY SIZES:
... this is where it gets gigantic!

3D STARS IN BEAUTIFUL SHAPE:

with LED light strings 230 volts, space-saving storage.

Art. No.: 900247LEDW
approx. 360 cm Ø · 1128 LED
75 W · approx. 54 kg

Art. No.: 900300LEDW
approx. 245 cm Ø · 960 LED
72 W · approx. 39 kg

Art. No.: 900295LEDW
140 cm Ø 376 LED
25 W · approx. 8 kg

Art. No.: 900368LEDW
100 cm Ø 160 LED
12 W · approx. 6 kg

Also suitable for lamp illuminations.

socket M25 with screw top,
6 m connection cable,
3 poles, assembled

Art. No.: 021.4453.1
Socket for illu flat cable, 2 poles
Art. No.: 021.4053.1
Socket for round cable, 2 poles

Art. No.: 022.4453.1
Plug for illu flat cable, 2 poles
Art. No.: 022.4053.1
Plug for round cable, 2 poles

Art. No.: 400.9999.7
Installation frame
Art. No.: 031.5053.1
Device connection socket

Art. No.: 404.9999.7
Surface mount for
installation frame and
device connection socket

Art. No.: 020.0153.1
Distribution block, 1 input
plug, 3 output sockets,
suspension device, 2 poles

Art. No.: 031.5053.1
Device connection socket,
3 poles, M 25 for street
lamps and poles, 3 poles

Art. No.: Z5.564.45531
Closure for socket

Art. No.: 414.6205.2
Closure for socket
with loss protection

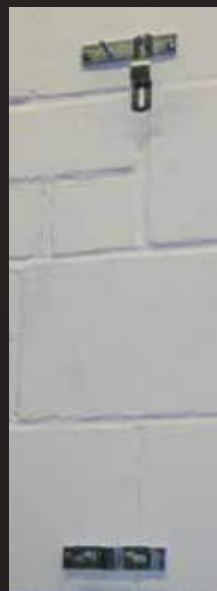

Special holders are offered for different mountings, such as pole or wall mountings or for hanging installations. Tailor-made constructions are also possible on individual customer request. The pole and wall mountings provide an easy solution for the installation because they are constructed as mounting aid by hooking in the motifs at the bottom.

★ Art. No.: MS-2
Tension band clamps and clamping plate for pole mounting, Ø from 60 - 120 mm, set with 2 pieces.

Pole mount mounting aid WH-3 incl. clamping plate

★ Art. No.: WH-1
Wall bracket for 90°-mounting

★ Art. No.: WH-2
Wall bracket for flat mounting

★ Art. No.: WH-3
for pole mounting

★ Art. No.: SH-1
Rope holder with snap hook

★ Art. No.: SH-3a
Rope holder for Fiberglass motifs up to 50 cm

★ Art. No.: SH-3
Rope holder for Fiberglass motifs over 50 cm

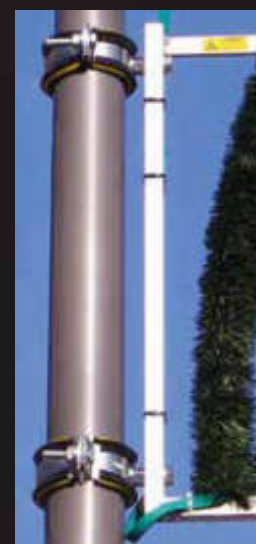

★ Art. No.: MS-2
Tension band clamps and clamping plate for pole mounting Ø from 60 - 120 mm

★ Art. No.: WH-3
Alu profile 90°

★ Art. No.:
Pipe clamps according to pole diameter

Traditional and innovativ since 1946

Light + Emotion = Essert

Planning - production - delivery
